
Prior: Laplacian, $\alpha = 1$, $\beta = 0.25$
Confidence
Mean
f(x)
x

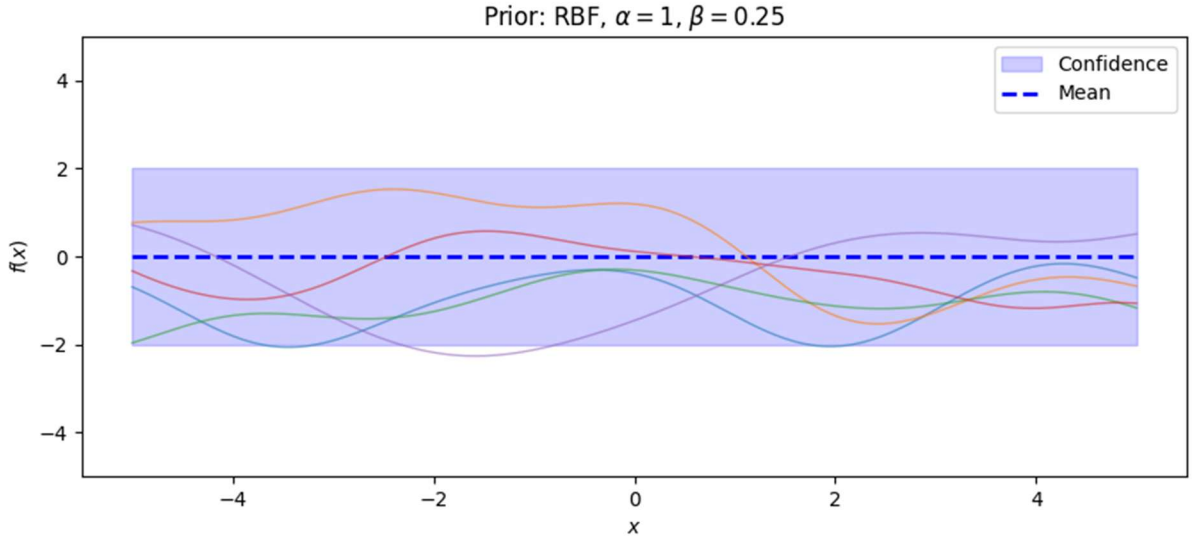

Posterior: Laplacian, $\alpha = 1$, $\beta = 0.25$
Confidence
Mean
Data
f(x)
x

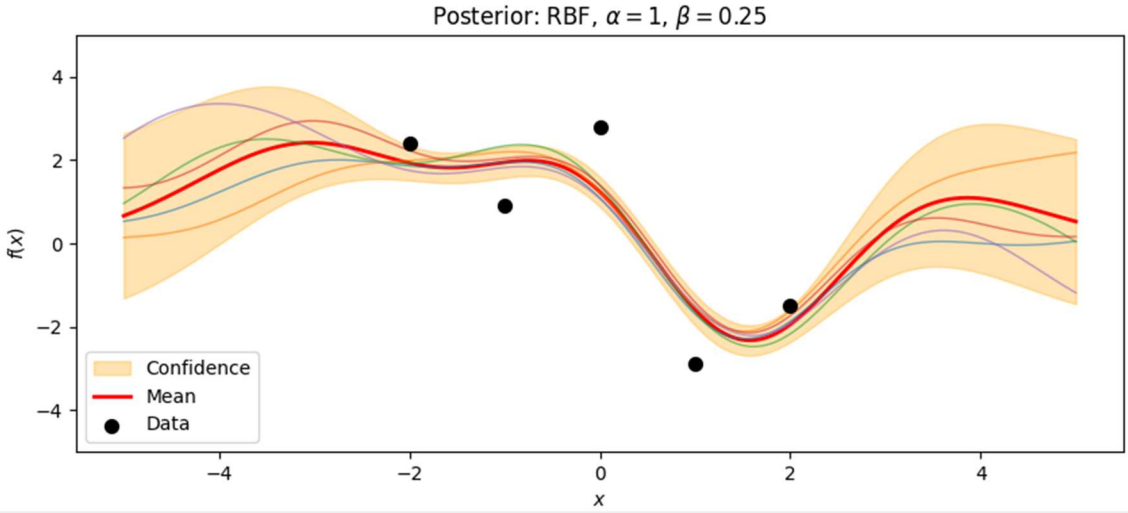

Prior: Laplacian, $\alpha = 1, \beta = 1$
Confidence
Mean
f(x)
x

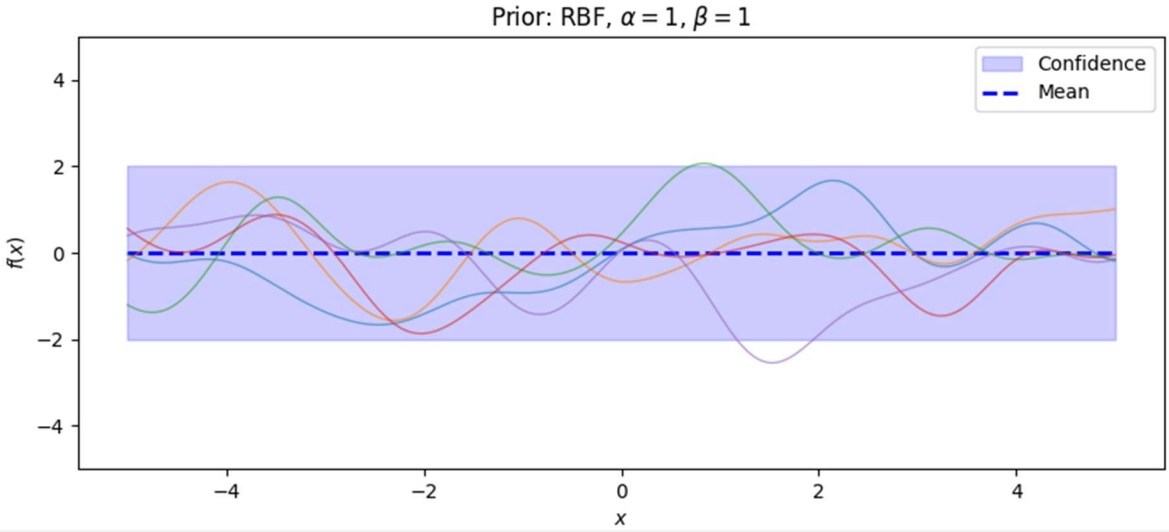

Posterior: Laplacian, $\alpha = 1, \beta = 1$
Confidence
Mean
Data
f(x)
x

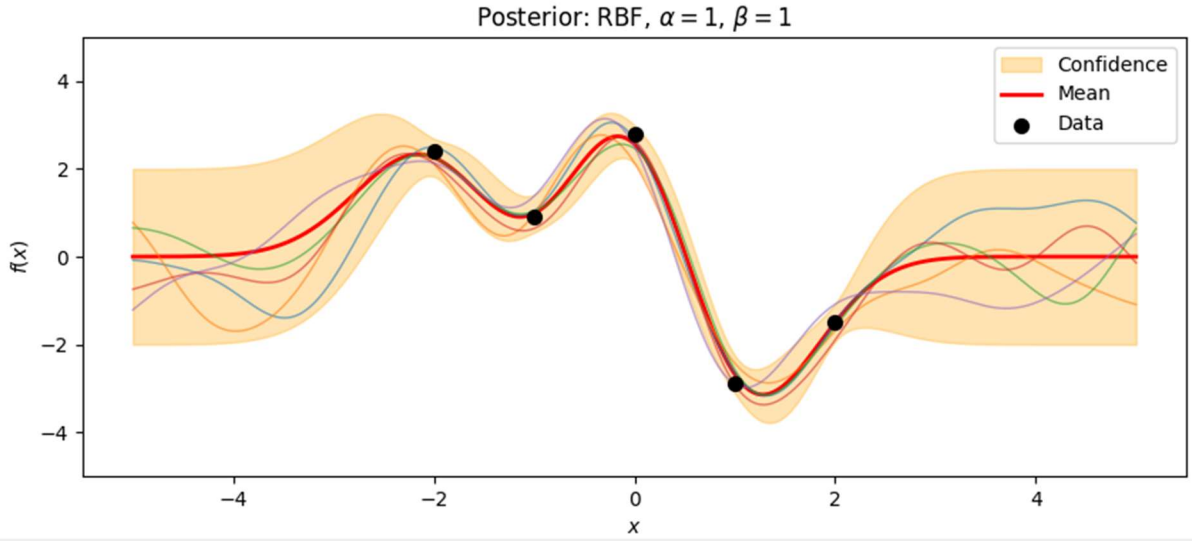

Prior: Laplacian, $\alpha = 1$, $\beta = 5$
Confidence
Mean
f(x)
x

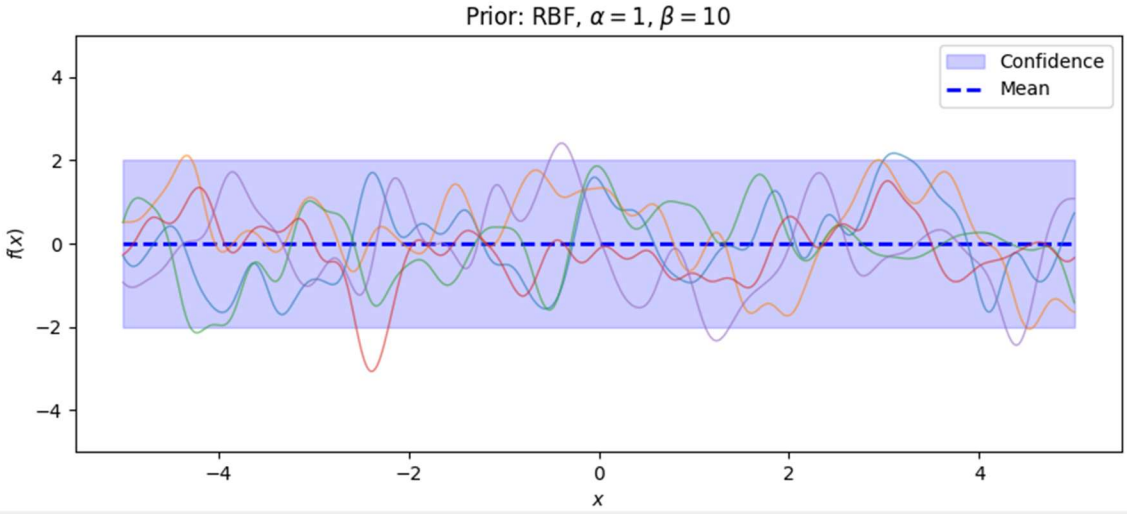

Posterior: Laplacian, $\alpha = 1$, $\beta = 5$
Confidence
Mean
Data
f(x)
x

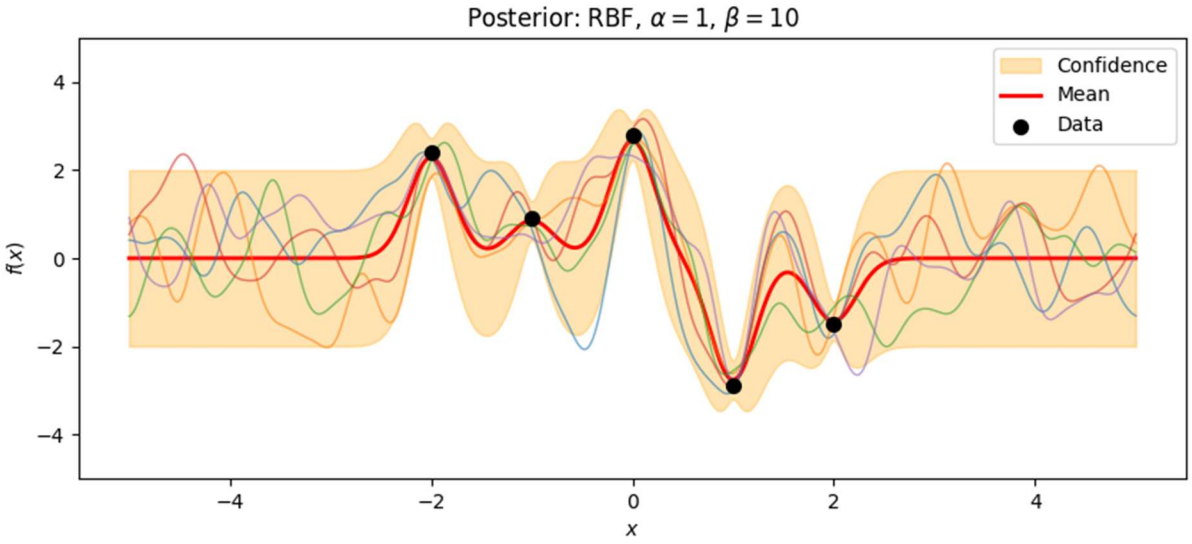

Prior: RBF, $\alpha = 1, \beta = 0.25$
Confidence
Mean
f(x)
x

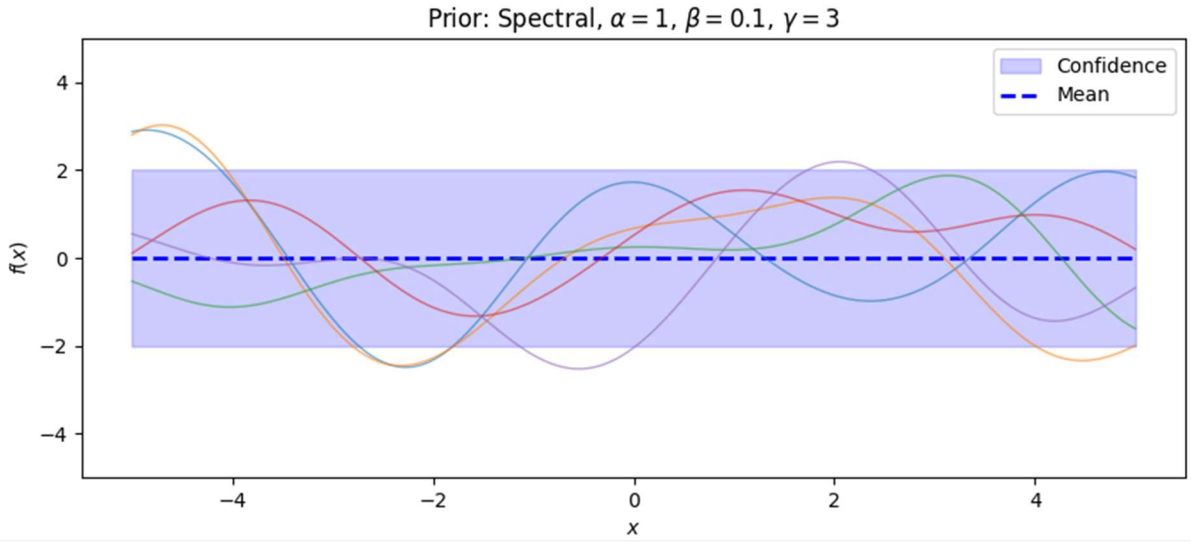

Posterior: RBF, $\alpha = 1, \beta = 0.25$
Confidence
Mean
Data
f(x)
x

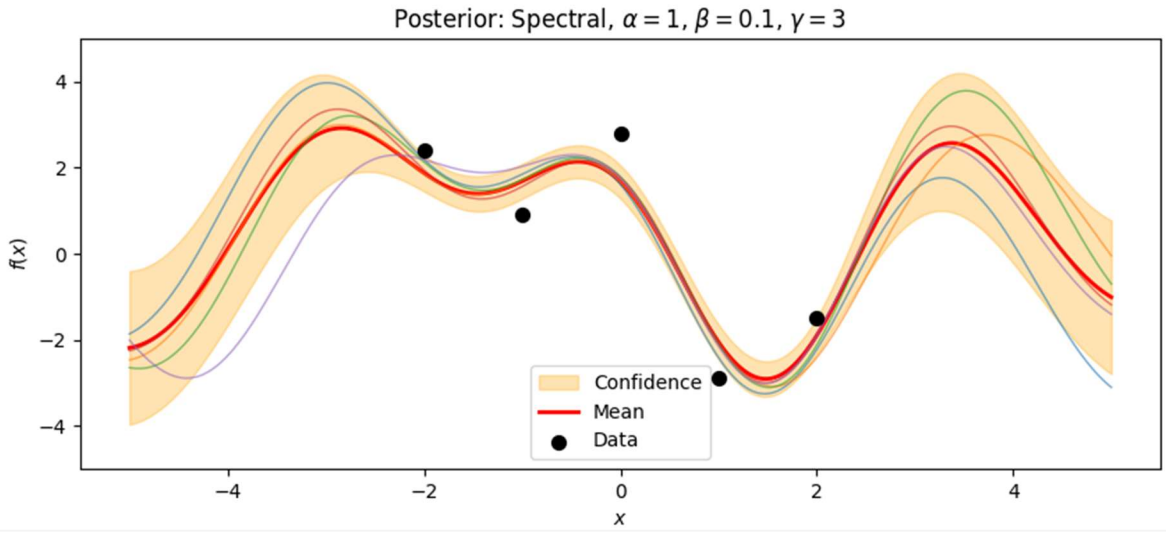

Prior: RBF, $\alpha = 1, \beta = 1$
Confidence
Mean
f(x)
x

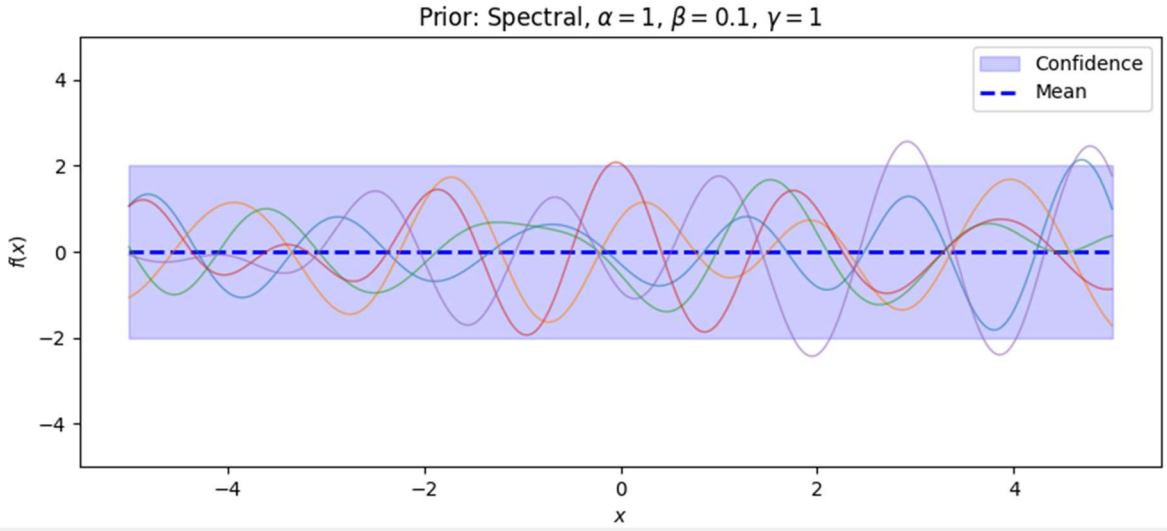

Posterior: RBF, $\alpha = 1, \beta = 1$
Confidence
Mean
Data
f(x)
x

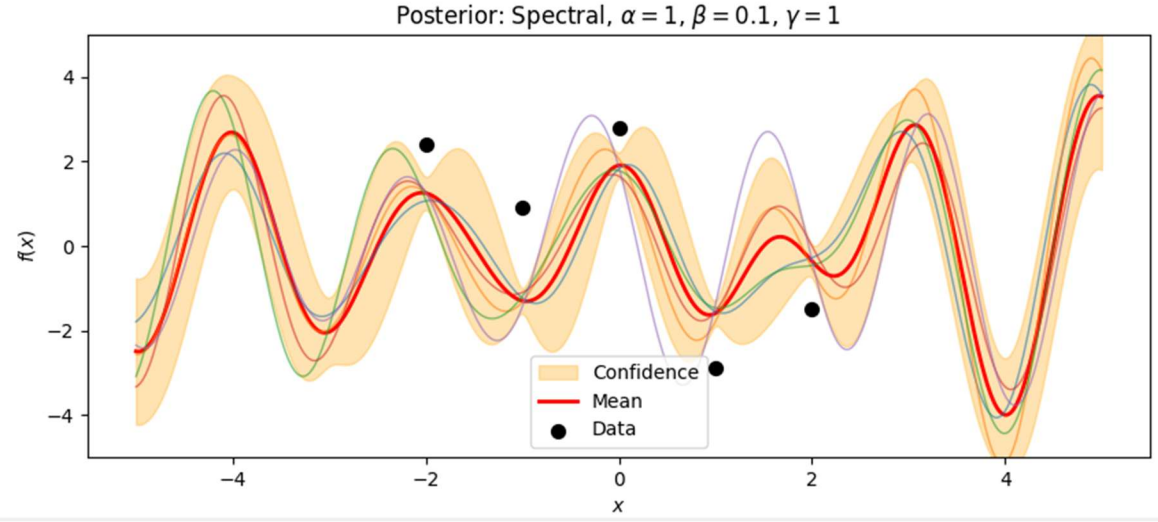

Prior: RBF, $\alpha = 1$, $\beta = 10$
Confidence
Mean
f(x)
x

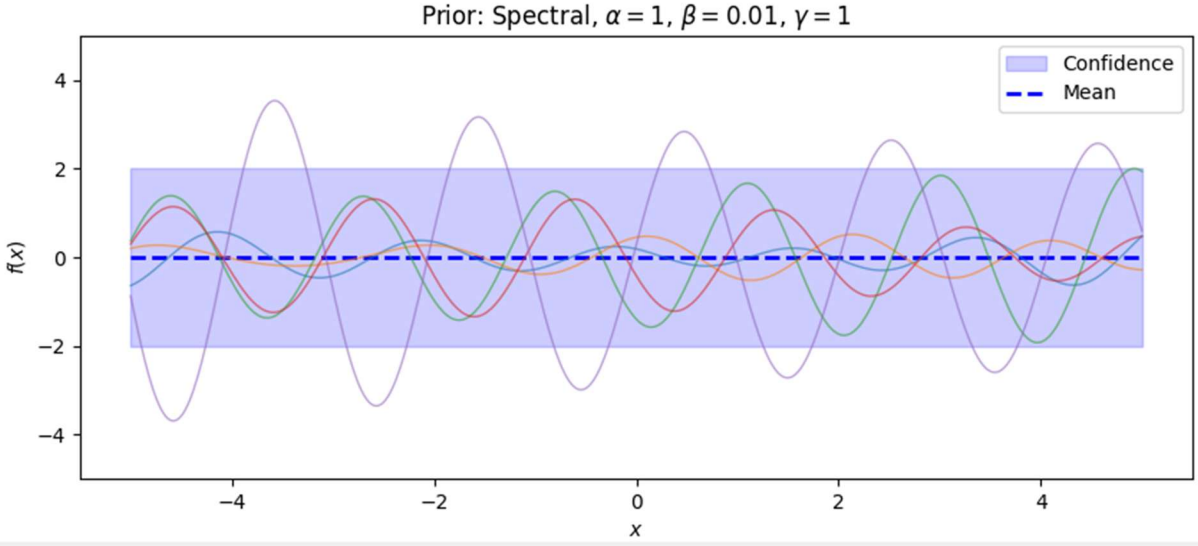

Posterior: RBF, $\alpha = 1$, $\beta = 10$
Confidence
Mean
Data
f(x)
x

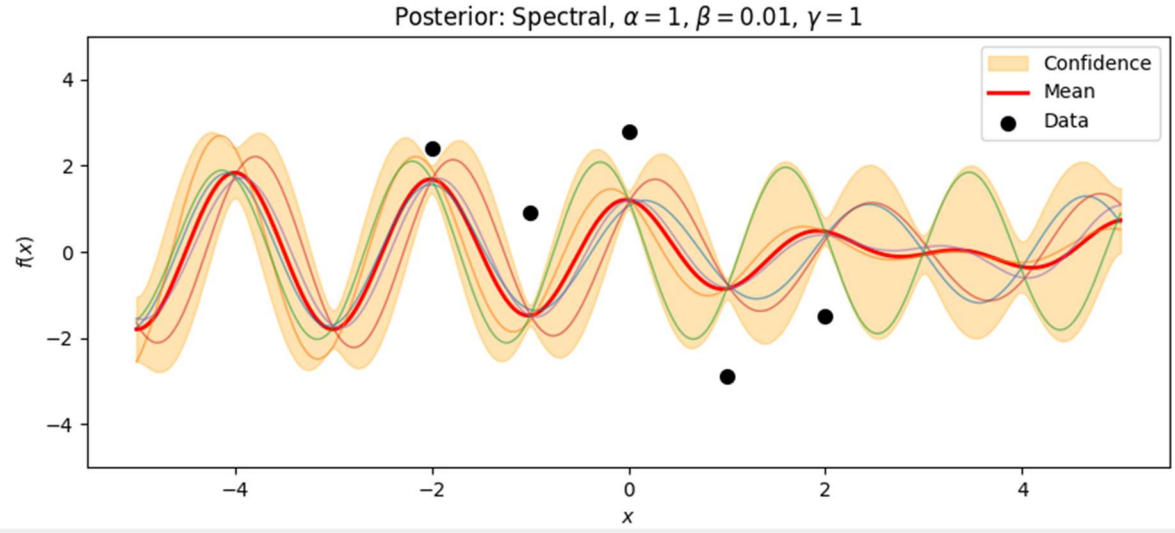

Prior: Spectral, $\alpha = 1$, $\beta = 0.1$, $\gamma = 3$
Confidence
Mean
f(x)
x

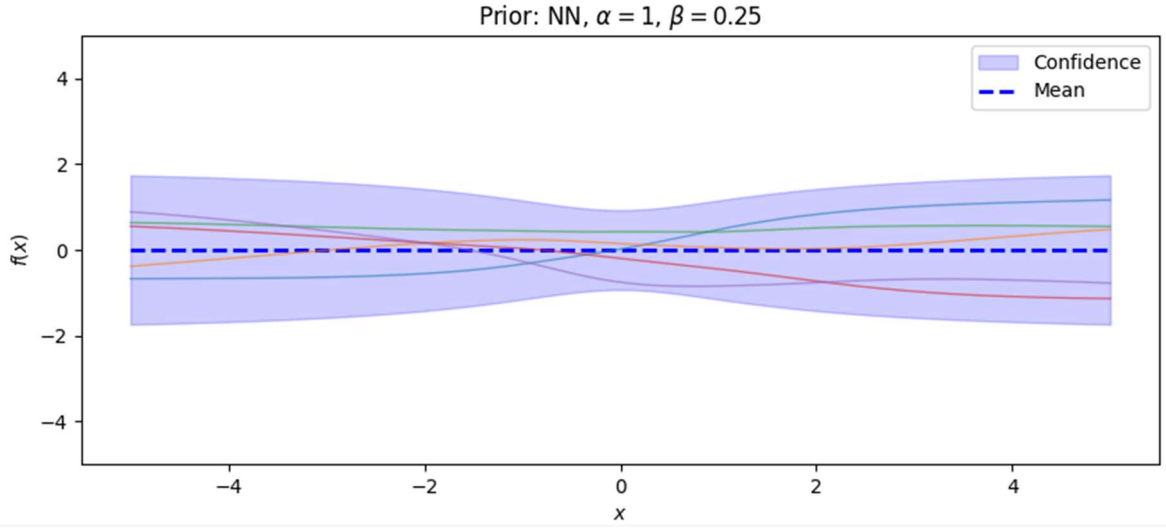

Posterior: Spectral, $\alpha = 1$, $\beta = 0.1$, $\gamma = 3$
Confidence
Mean
Data
f(x)
x

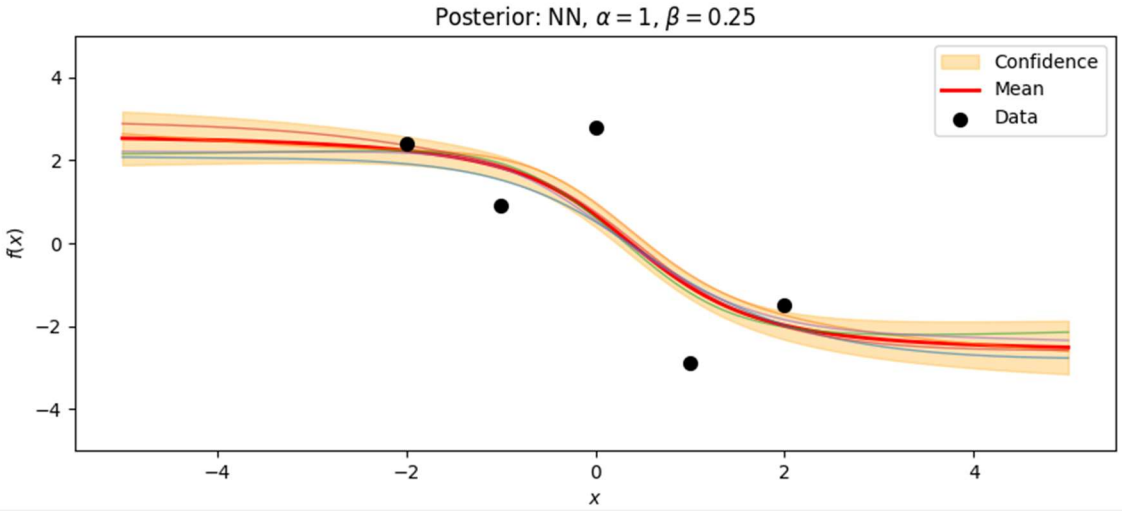

Prior: Spectral, $\alpha = 1$, $\beta = 0.1$, $\gamma = 1$
Confidence
